

CASE STUDY: **CORPORATE INTERIORS**

CENTENNIAL LAKES DENTAL

CHALLENGE

With the recent move for Golden Valley Centennial Lakes Dental group into their new office space, The team had the opportunity to transform blank space and incorporate dynamic graphic focal points throughout areas of the new office.

SOLUTION

Looking to create an warmer, inviting office experience, Centennial Lakes Dental partnered with Pictura Interiors to design and enhance areas of their office space to deliver a compelling branded atmosphere. Each exam room is outfitted with an acoustic SEG fabric frame of Minnesota scenery images. Acoustic systems help reduce ambient machine noise while delivering an aesthetically clean look which over time can easily be changed out with different imagery. Vinyl wall graphics are applied in the lobby and sink station wall space to create a visual focal point for customers. In the entrance of the dentist office hangs sectional acrylic panels showcasing Centennial Lakes vision statement and testimonials from happy customers. Finally, an enlarged wallcovering mural of the Minneapolis skyline spans the hallway wall to create a visual atmospheric environment for employees and customers as they walk through the dental office.

RESULT

Centennial Lakes Dental strives to create an enjoyable, hassle-free experience for their customers. With some creative design solutions, Pictura was able to incorporate both engaging and functional elements to Centennial Lakes Dental's new space.
